

Vetramil[®] AURIS

THE NATURAL POWER OF HONEY

Product Information

Product

Vetramil[®] Auris: Ear drops for domestic animals
Bottle with dropper, 50 ml

Ingredients

Propylene glycol, Honey, Aqua, Polysorbate 80.

Indications

Supports the recuperative powers of irritated, red skin in the outer auditory canal.

Beneficial Effects

The active ingredient in Vetramil[®] Auris ear drops is honey combined with propylene glycol. The honey in Vetramil[®] is rich in natural enzymes and has a low pH. The enzymes and natural antioxidants of honey help to protect the sensitive skin. Because of the slightly viscous composition the drops spread out easily over the whole outer auditory canal, soothing and calming the skin of the ear.

Contraindication(s), Side-effect(s) and/or Special Precautionary Measures

Not for use on animals with perforated eardrums.

In the case of an ear infection with signs of inflammation, with or without pain, it is advised to seek the medical advice of a veterinarian.

Directions for Use

- Administer a few drops into the ear.
- Apply once or twice a day.
- Treat the ear for 7 to 14 days.

Notes on Correct Use

- Remove the protective cap from the dropper.
- Administer the drops into the outer auditory canal.
- After use, put the protective cap back on the dropper.
